[1 piece]

WedsSport Forged Wheel has created by "Designed Die Press Forging" method;forging total process from wheel base to design surface using a number of press machines and precision die. 480°C heated cylindrical billet quickly compressed by 9,000 Ton press machine. Completely refined grain of aluminum by hydraulic press machine generate metal flow line along with wheel form which allows the material to be absolutely durable. Rims are formed by spinning process. Heating and cooling process enhances strength. Furthermore, "Shot Peening" small grain of metal enhances wheel surface and improves its strength. Pursuing ultimate lightweight and rigidity, WedsSport Forged Wheel is "Made in Japan" using premium technology suit to every needs of motorsport wheel.

FACE TYPE

INCLUDES FLAT CENTER CAP

■ AVAILABLE FINISHES: DIAMOND SILVER
DIAMOND BLACK
■ INCLUDES: Center Cap, Aluminum Air Valve
■ BOLT HOLE DIAMETER: φ32
■ 60 degree tapered, bottom length 28mm,
φ14 bolt can be used
■ Adaptor sold separately
NOTE: Weight can subject to change
NOTE: Normal car with
* indicates wheel might protrude
out of the fender
